

## **Civil Engineer – Water/Wastewater**

**Location:** Readington, NJ

**Salary:** \$60,000 - \$95,000

Many of our client firms are seeking BSCE's with expertise in Water, Wastewater, Municipal, Hydrologic, and Water Resources projects. PE license preferred but not required. All levels will be considered, from recent graduates to top engineering management. These are challenging growth opportunities in consulting engineering which offer varying degrees of advancement from project management to associate and equity positions. Many firms will consider relocation expenses for senior level positions (PE only). A shortage continues for capable civil engineers throughout the Mid-Atlantic Eastern Seaboard region - maybe it's time to consider relocation? Comprehensive benefits, competitive compensation, and (in some cases) incentives are offered.

### **Requirements:**

Ideal candidates will have a BSCE or equivalent degree and knowledge or expertise in Water, Wastewater, Hydrology, or Water Resources technology from a consulting engineering/design/project management perspective. A PE license is preferred but not absolutely required.

## **Mechanical Engineer – Commissioning**

**Location:** Allentown, PA

**Salary:** \$60,000 - \$85,000

Our client, a leading local consulting MEP firm, is seeking several experienced Commissioning Engineers to lead projects for commercial and institutional projects. Experience in field commissioning, commission planning and overall project management required. Responsibilities also include developing comprehensive test scripts for commissioning of mechanical systems, writing action plans and functional test procedures; facilitate weekly progress meetings, specifications, documentation, client and contractor liaison, budget management, and documentation. Additional duties will involve design projects for mechanical systems for commercial and institutional facilities. Comprehensive benefits, competitive salary, and modern, stable, environment offering career growth are all available.

### **Requirements:**

BSME or equivalent degree at a minimum. Facilities commissioning and some design capability for mechanical building systems needed. PE preferred - EIT considered if PE is near future plan.

## **Food Industry**

**Location:** Philadelphia, PA

**Salary:** \$38,000 - \$85,000

Delaware Valley Food Production, Processing, and Packaging. Our clients are Delaware Valley based food product processing, packaging, and distribution firms. These are solid career opportunities with firms continuing to grow despite the challenges of the current economy. They are currently seeking to hire:

**Plant Managers (to \$85K), Production Managers (to \$60K), Quality Managers (to \$65K), Maintenance Managers (to \$65K), Maintenance Supervisors (to \$58K), Maintenance Technicians (to \$50K), Quality Technicians (to \$38K), Product Development Scientists (to \$68K)**

All offer a fantastic opportunity for career growth and stability! Opportunities are available throughout the Delaware Valley and into northern Maryland. Comprehensive benefits, competitive compensation, and challenging and rewarding responsibilities are available.

**Requirements:** Food Industry experience and know how is required. Expertise in any of the positions listed above is needed. Management positions generally favor a four year college degree in a related field. Reliable individuals with a proven track record and strong work ethic are always of interest.
